

Dilutions Worksheet

1. How many milliliters of 18M H_2SO_4 solution is required in the preparation for 50.0 mL of 2.0M H_2SO_4
2. How would you prepare 120 mL of 0.40M sodium sulfate solution from a 3.0M Na_2SO_4 solution?
3. What volume of 0.20M HCl solution can be prepared from 50.0 mL of 1.00M HCl solution?
4. What is the molarity of a phosphoric acid solution made by diluting 15 mL of 9.0M H_3PO_4 with sufficient water to a final volume of 120 mL?
5. What volume of water must be used in the preparation of 6.0M HNO_3 from 12 mL of 12M HNO_3 ?
6. How much water must be added to 25 mL of a 0.50M solution to prepare a 0.10M solution?
7. To what volume should 3.00 mL of 10.0M ammonia be diluted to give 0.50 M ammonia?
