

CHEMICAL -SEPARATION TECHNIQUES

Instructions:

For each:

1. Decide whether the following are solutions or mechanical mixtures.
2. Explain how you would separate the components of these mixtures.
3. Identify the property that allows the separation.

(a) salt & sand 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :	(g) talcum powder (baby powder) & water 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :
(b) Salt water 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :	(g) Kool-Aid 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :
(c) Soda water 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :	(i) Gravel & sand 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :
(d) Iron filings & water 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :	(j) Dusty air 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :
(e) Muddy water 1. <u>Type</u> : 2. <u>Separation</u> : 3. <u>Property</u> :
